

# KATHERINE LYNNER

Software Engineer

## SUMMARY

Creative, detail-oriented, Software Engineer experienced with React, TypeScript, JavaScript, HTML, and CSS. Comfortable working independently or collaborating with a team. I am seeking a challenging environment to grow my skills as a Software Engineer.

## WORK EXPERIENCE

### Web Developer (Contract) | The Brand Office — Remote

2024 — Present

Collaborate with The Brand Office on development projects, creating responsive websites for various clients.

Translate design mockups into responsive websites using HTML, CSS, JavaScript, Wordpress, and Joomla.

Manage Google Analytics tracking setup and reporting for client websites, ensuring accurate performance data collection and insights.

Support ongoing updates, troubleshooting, and optimization for client websites.

### Software Engineer | Kate's Consulting — Waconia, MN

2023 — Present

Create web applications and static websites for different clients across small businesses. Also, consult on SEO and social media strategy. Some clients include:

Bremmer Construction

Complete Concrete & Construction

#### Projects:

**Meal Ideas App** – Users can click to cycle through a wide variety of different meal and food ideas. Each one shows an image and full recipe.

**Math Game** – Users choose between addition, subtraction, multiplication, or division. They can play until they get 10 correct answers, at which point they win the game.

**Todo List App** – Users can create projects to make lists of tasks that can be saved to the project of their choosing. Tasks and projects are then saved using local storage.

**Other Projects:** Library app, Etch-A-Sketch game, and more
